

More About the Massachusetts Toxics Use Reduction Program

Every company that uses toxics in the Commonwealth has access to three state organizations that form the Massachusetts Toxics Use Reduction Program – the Office of Technical Assistance, which works on-site with companies to implement less toxic processes; the Toxics Use Reduction Institute, which conducts research and provides education; and the Department of Environmental Protection, which enforces the Toxics Use Reduction Act (TURA) regulations. Since its inception, the Toxics Use Reduction Program has helped Massachusetts industry reduce the amount of hazardous waste generated by over 60% and chemical use by over 40%.
